Milgram (1963) Generalisability

1. One weakness of Milgram (1963) is that the study could be said to lack generalisability. For example...

_____

2. This is a weakness because it means that his conclusion that the majority of 'ordinary' people are highly obedient, even if it involves inflicting harm may not be true of....

_____

3. Competing argument: This said, some might argue that Milgram;s conclusion are generalisable to some extent because...

_____
